

Architectural & Engineering Firm C2AE Continues Its Steady Growth in 2010

LANSING, MI – January 24, 2011 – C2AE, a Michigan-based architectural and engineering firm known for its ability to offer a diversity of award-winning design services in-house, performed well in 2010.

“We are extremely fortunate to have done so well in these tough economic times, states Bill Kimble, C2AE President & CEO. “We are also blessed to have hired so many talented staff members which has strengthened our team in many areas of the business and positioned us for continued growth as we move into 2011”, continued Kimble.

C2AE continued its growth by hiring seventeen (17) new staff members, moving beyond Michigan’s borders, and securing several new clients. The firm is also expanding its licensing into four (4) other states, including Alabama, North Carolina, South Carolina, and Ohio. Listed below are several key individuals that joined C2AE in 2010.

Eric Rantanen, PE, PMP, LEED® BD+C joined C2AE as a Project Manager. Eric is a licensed mechanical engineer; his expertise lies in HVAC, plumbing and fire protection design and specifications, sustainability and green design practices, LEED® project certifications, commissioning, and energy and facility audits.

John Harvey, PE, LEED AP was initially hired as a Director, but was recently promoted to the Business Unit Leader position overseeing the Infrastructure teams. John has over 20 years of experience in the field of civil engineering, highway design and construction and land development.

Nathan Golin, AIA is a project architect in the Grand Rapids office. He has a strong technical understanding of building construction coupled with a strong sensibility for design and aesthetics. Nate serves as the Vice President of the Board for the Grand Valley Chapter of the American Institute of Architects (AIA).

Norm Farhat, PE, is a Structural Engineer with over 15 years of experience. Hired as a Project Manager, Norm manages and focuses on government and industrial-related building projects, including all aspects of engineering and architectural design, from concept to construction.

David Holmgren, PE was hired as a Project Manager in the Escanaba office. As a Civil Engineer, Dave provides analysis, design and review for wastewater and water treatment facilities, water and sewer systems, water storage reservoirs, pumping stations, odor control facilities, and other related projects.
