

Legislative Vision

The Legislative Vision expresses long-term aspirational goals of the Association. The Michigan Townships Association envisions a 21st-century Michigan where:

- Townships have statutory authority and state financial support sufficient to provide high-quality services and infrastructure consistent with community needs and expectations, and to enable full compliance with ever-expanding state-imposed mandates without cutting local spending priorities
- Elections encourage a high level of voter participation
- Townships are valued and respected for solving local and regional challenges through visionary, ethical leadership and collaboration
- Natural resources are developed from townships in a manner consistent with township regulations that protect public safety and property values
- There is clarity of roles and responsibilities among township officials essential for efficient and effective services to the public
- Townships retain authority to protect and regulate the public rights-of-way and other land uses in the interest of the public
- State laws recognize that township officials are elected by and accountable to their residents for the township's governance, financial position, programs and services consistent with community values

Assessment and Taxation

The Michigan Townships Association supports property tax fairness, equity, and efficient assessment and collection by public servants who are accountable to township officials to ensure public trust and locally accessible information and assistance. Valuation should be based on sound assessing principles. Local governments should be reimbursed by the state for property tax revenues lost due to statutory exemptions. State government should provide local governments with education and technical support to develop and defend their assessment rolls.

As lawmakers and regulators enact changes to current tax laws and local government requirements, the Michigan Townships Association supports the following objectives:

- Valuation of big box stores should be determined using the same assessing methodology as other commercial properties and prohibit the consideration of private deed restrictions or covenants imposed to reduce the value of the property or exclude competitors of the grantor from the market
- Clarify the current statutory criteria for charitable institution property tax exemptions and oppose expansion of exemptions

- Raise the current charter township 10 mill tax limitation to allow charter townships, with voter approval, to address legacy costs, meet demands for expanding services, and offset millage rollback requirements
- Recodify Michigan township statutes to include clarification that assessors are accountable to the township board when the supervisor is not certified to perform assessing functions
- Increase the specific tax on mobile homes located in licensed parks
- Exempt minimal personal property tax obligations resulting from minor property improvements on mobile home lots such as small decks, stairs and porches

Elections

The Michigan Townships Association supports fair, transparent and efficient elections administered by township officials that encourage high voter participation and procedures appropriate to varying community resources and population densities.

As lawmakers and regulators enact changes to current election laws, the Michigan Townships Association supports the following objectives:

- Preserve authority of townships to convey information on ballot proposals to their residents
- Allow candidates seeking township office to pay a filing fee in lieu of filing petition signatures
- Preserve the authority of townships to place millage and bond proposals before voters at any election

Environment and Land Use

The Michigan Townships Association supports state laws that enable townships to efficiently and effectively plan for land uses and adopt zoning ordinances to protect the public health, safety and general welfare. State and federal regulations should not impede local government growth and development policies and objectives. Further, preemption of local land use authority should be limited to issues of great statewide impact and any resulting adverse local impacts should be mitigated by the state or federal government.

As lawmakers and regulatory agencies enact changes to laws addressing township land use and environment, the Michigan Townships Association supports the following objectives:

- Require local approval for any DNR purchase of land in townships where a significant amount of land is commercial forestland or is owned by the State of Michigan
- Require DNR to notify townships and provide opportunity to discuss a proposed state land acquisition

- Statewide septic system maintenance standards to reduce septic system failures that create serious public health threats and expose townships to being required to build expensive public sewer systems
- Require lead and copper rules be supported by science-based risk assessment
- Preserve landfill capacities by directing appropriate materials to waste utilization facilities
- Preserve local authority on zoning issues that are strictly local in nature

Intergovernmental Relations

The Michigan Townships Association supports intergovernmental collaboration to restore economic prosperity, efficiently and effectively deliver programs and services, and solve other challenges. State laws should allow creativity, flexibility and incentivize fair and equitable cost-sharing, benefits and governance in inter-local agreements. State laws authorizing economic development tools and other powers should be based on community characteristics relative to policy objectives, rather than city or township legal status. State taxation and spending policies should mitigate adverse revenue impacts on townships.

As lawmakers and regulatory agencies consider altering the fiscal relationship of the state to local governments as well as powers and authorities of local governments, the Michigan Townships Association supports the following objectives:

- Full funding to townships for payments-in-lieu-of-taxes, commercial forest program and the swamp tax program
- Expand the number of townships eligible for statutory revenue sharing and grants
- Allow a municipality to create or continue the use of a tax increment financing (TIF) authority to capture tax revenue attributable to increases in property value within an area or district and allow the use of that money for identified TIF purposes
- A local government consolidation process that continues to require voter approval

Township Operations

The Michigan Townships Association supports state and federal governments granting to Michigan townships broad discretion and autonomy to govern the funding and delivery of programs and services. MTA also supports state reimbursement to townships for increased costs resulting from new mandated services and state regulations. Michigan Townships Association supports the following objectives:

- Modernizing state laws to clarify the governance role of township boards to establish policy direction for townships
- Provide townships that are struggling to pay for retiree pensions and health care benefit commitments the flexibility to choose solutions that are appropriate to local circumstances

- Appropriate, cost-effective training requirements for township planning commissioners, zoning board of appeal members and board of review members to reduce costly lawsuits and improve township decision-making by key appointed boards
- State funding to townships providing public safety protection to state-owned, tax-exempt properties

Transportation and Infrastructure

The Michigan Townships Association concludes that Michigan's road system will continue to require more funding than is currently anticipated in law to ensure that county primary and local roads are safe and convenient for travel. As townships are major financial contributors to road maintenance and construction costs, the Michigan Townships Association supports the inclusion of township officials in transportation policy discussions at all government levels. Michigan has also under-invested in other infrastructure necessary to remain economically competitive and protect the health, safety and general welfare of residents.

The Michigan Townships Association supports the State of Michigan working with township officials in planning, funding and delivering infrastructure needed by every community to be economically viable and free of environmental threats and risks.

As lawmakers and regulators address pressures to better address Michigan's infrastructure, the Michigan Townships Association supports the following objectives:

- Additional funding above current statutory levels for primary and local roads and increased funding for water, sewer and communications infrastructure
- Allow townships with voter approval to create special assessment districts for communications infrastructure including broadband and high-speed internet
- Require road agencies to comply with a township's Complete Streets Policy resolution
- Encourage county road commissions or departments to provide matching funds for township road construction and maintenance projects to be spent at the township's discretion
