

### Handout #3: Scenario Cards: Residents of Stinky Lake

#### Residents for homes #1-5

You are tired of having nowhere for your poop to go. You don't really care what happens at those township board meetings, but you want a sewer in your neighborhood. You, however, do not have very much money and have not been able to work for a few months. You can't pay much money for the sewer project if it is approved, and if it is, you know it will be expensive.

#### Residents of homes #6-10

You are extremely interested in getting a sewer installed at Stinky Lake. You decide to organize the lake residents, together with your neighbors in homes 6-10, and get them to understand that a sewer is necessary, no matter how much it costs, and that you must demand that the township board installs a sewer.

#### Residents of homes #11-15

You need a place to put your poop, because it is really starting to stink. You decide to talk with your neighbors about how important a sewer system is, and that you need to get moving in the right direction. You decide to work with your other neighbors to write a petition to have the township board members hear your concerns. You must have 51% of the residents of Stinky Lake sign this petition in order for the board to hear your proposition for a sewer system, and for them to do research by experts that will determine whether or not the sewer can be installed on the lake for safety reasons.
